CUGH 11th Annual Global Health Conference
GLOBAL HEALTH IN A TIME OF WORLDWIDE POLITICAL CHANGE
Washington Hilton Hotel | Washington, DC

CONFERENCE: APRIL 18 – 20, 2020
SPECIAL SATELLITE SESSIONS: APRIL 17, 2020
8:30 am - 10:00 am  
Room: International Ballroom East // Concourse Level

CS01: CONCURRENT SESSION

Human Trafficking Prevention and Intervention Efforts: Successes, Challenges, and Future Direction
Track: Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

Human trafficking is a form of modern-day slavery in which traffickers use force, fraud, or coercion to entrap victims in commercial sex, domestic servitude, and forced labor. Estimates suggest that there are 25 million victims of this global, multi-billion dollar criminal industry. This panel of leading policymakers and practitioners will discuss the current global trends and drivers of human trafficking, the strengths and weaknesses of the responses to date, and promising prevention approaches going forward. Ambassador Susan Esserman, founder and director of the University of Maryland Support Advocacy Freedom and Empowerment (SAFE) Center for Human Trafficking Survivors, will moderate the panel. The SAFE Center is an initiative of the University of Maryland Strategic Partnership: MPowering the State, a collaboration between the University of Maryland, Baltimore and the University of Maryland, College Park.

Speakers:
Ambassador Susan Esserman, Founder and Director of the University of Maryland Support, Advocacy, Freedom, and Empowerment (SAFE) Center for Human Trafficking Survivors

8:30 am - 10:00 am  
Room: International Ballroom West // Concourse Level

CS02: CONCURRENT SESSION

The Multiple Burdens of NCDs
Track: Non-Communicable & Communicable Diseases

While much progress has been made towards understanding the biological basis of metabolic and cardiovascular diseases, their complex nature – as a product of interactions between genetic and environmental factors – calls for integrative and innovative approaches in order to translate biology into clinical advances. This panel will debate the broad social and economic trends that drive the rise in cardiometabolic disease and will be challenged by the moderator to propose ways to rethink how those trends affect development.

**Moderator:**
**Rachel Nugent**, Vice President Global NCDs, RTI International; Department of Global Health, University of Washington, USA

**Speakers:**
**Sir George Alleyne**, Director Emeritus, PAHO, Barbados
**Tom Bollyky**, Director of Global Health and Senior Fellow, Council on Foreign Relations, USA
**Adnan Hyder**, Senior Associate Dean Research and Professor of Global Health, Milken Institute School of Public Health, George Washington University, USA
**Tolu Oni**, Clinical Senior Research Fellow, University of Cambridge MRC Epidemiology Unit's Global Public Health Research Programme, Honorary Associate Professor in Public Health, University of Cape Town, South Africa
**Johanna Ralston**, CEO, World Obesity Foundation, UK

8:30 am - 10:00 am
Room: Georgetown // Concourse Level

CS03: CONCURRENT SESSION

**Disabilities in the Global South: A Call to Action**
Track: Addressing the Social Determinants of Health

This panel brings together academic and NGO experts in disability work in the Global South to discuss the WHO urgent call to action on disability issues in global public health. This panel will highlight asset-based ethical program models and grassroots projects that create inclusive communities in underserved regions.

**Moderator:**
**Moira Rogers**, Director of Programs and Latin America, Child Family Health International, USA

**Speakers:**
**Joel Buenaventura**, Medical Director, Remote Island Medicine Program for the Philippines, Child Family Health International, the Philippines
**Kripa Dholakia**, Clinical Instructor, Widener University, USA
Charles Nwobu, Country Medical and Program Director for Ghana, Child Family Health International, Ghana
Jessica Sanchez Vargas, Director of MiPequenaAyuda, MySmallHelp, Peru

8:30 am - 10:00 am
Room: Jefferson // Concourse Level

CS04: CONCURRENT SESSION

Training the Next Generation of Global Health Researchers: the NIH-Fogarty Global Health Fellows Programs
Track: Strengthening Health Systems, Public Health, Primary and Surgical Care

The Fogarty International Center, with partners at the NIH, supports global health research training to U.S. and LMIC pre- and postdoctoral trainees from all health-related disciplines. The Global Health Fellows and Scholars Program supports six consortia of U.S. academic institutions to provide mentored research training opportunities at international partner institutions in developing countries with robust clinical research programs. Each consortium includes four U.S. academic institutions and their respective international partner institutions, offering global health research training in communicable diseases, non-communicable diseases, and translational and implementation sciences. On this panel, alumni will discuss their research and training experiences, and career paths.

Moderator:
Wafaie Fawzi

Speakers:
Luke Smart
Meghan Burke Fitzpatrick

8:30 am - 10:00 am
Room: Lincoln // Concourse Level

CS05: CONCURRENT SESSION

Health Research in Humanitarian Crises: Why it is Needed and How it is Done

Humanitarian crises – including armed conflict, forced displacement, disease outbreaks, and natural disasters – affect more people today than any point in recorded history. Yet, the evidence base informing how humanitarian organizations respond to these crises is weak. The global health research community is playing a role in addressing this evidence gap by studying key scientific questions that can only be answered through research. In this session, researchers will share their own experiences in the field studying important public health issues in crises, highlighting the urgent need for high-quality research and the strategies used to work in these challenging settings.
Moderator:
Brandon Kohrt, Charles and Sonia Akman Professor in Global Psychiatry; Associate Professor of Psychiatry, Global Health, & Anthropology, George Washington University, USA

Speakers:
Bachera Aktar, Co-Assistant Director of Centre of Excellence for Gender, Sexual and Reproductive Health and Rights, BRAC James P Grant School of Public Health, BRAC University, Bangladesh
Rana Dajani, Associate Professor of Molecular Cell Biology, Hashemite University, Jordan
Laura Ho, Deputy Director, Health Unit, International Rescue Committee, USA
Denisse Vega Ocasio, University of Rochester, USA

8:30 am - 10:00 am
Room: Columbia 3,4 // Terrace Level

CS06: CONCURRENT SESSION

ORAL ABSTRACT PRESENTATIONS: Planetary Health, One Health, Environmental Health, Climate Change and Pollution

Speakers:
Takujungla Jamir, University Health Center, Nagaland University, India
Brucellosis Among Pyrexia of Unknown Origin Cases in Amsing Jorabat Sub-centre, Kamrup Metro, Assam, India 2015

Zoe Grange, One Health Institute, University of California Davis, USA
SpillOver: Ranking the Risk of Viral Spillover from Animals to Humans

Oliver A. Elorreaga, Emerge, Emerging Diseases and Climate Change Research Unit, Universidad Peruana Cayetano Heredia; Pontificia Universidad Católica del Perú, Peru
El Niño/Southern Oscillation (ENSO) and Stunting in Children under Five in Peru

Sylvia Blom, Cornell University, USA
Heat Exposure and Children's Nutrition: Evidence from West Africa

Mazbahul Ahamad, School of Natural Resources, University of Nebraska-Lincoln, USA
Household Smoke Exposure Risks from Cooking Fuels and Places in Tanzania: A Cross-sectional Analysis of Nationally Representative Survey Data

Pallavi Oruganti, Veterinary Preventive Medicine, The Ohio State University, USA
Influence of Sociodemographic Factors on Zoonotic Pathogen Risk in a Resource-Limited Community at the Livestock-Wildlife Interface, Mpumalanga, South Africa
Andria Rusk, Dominican University of California, USA
Spatiotemporal dynamics of vector-borne disease risk varies across human land-use gradients: Examining the role of agriculture, indigenous territories, and protected areas in Costa Rica

8:30 am - 10:00 am
Room: Columbia 6 // Terrace Level

CS07: CONCURRENT SESSION

ORAL ABSTRACT PRESENTATIONS: Translation and Implementation Science, High Impact Development Initiatives, Bridging Research to Policy, Reforming Academia

Speakers:
Nadia Sam-Agudu, University of Maryland Baltimore, USA
Tuberculosis Preventive Therapy Uptake among People Living with HIV/AIDS in Northern Nigeria

Chiqui de Veyra, National Institutes of Health, the Philippines
The War on Worms Campaign: Bridging Research to Policy for the Prevention and Control of Neglected Tropical Diseases in the Philippines

Oge Onuh, Department of Surgery, Icahn School of Medicine at Mount Sinai, USA
Cost Analysis and Barriers to Implementing and Sustaining a Successful Long-Term International Surgical Resident Rotation

Palmira Fortuanto dos Santos, Mental Health - Center for Applied Psychology and Psychometric Tests, Ministry of Health of Mozambique, Mozambique
Implementation of mhGAP in Mozambique: Integrating Epilepsy Care into the Primary Health Care System

Yvonne Commodore-Mensah, African Research Academies for Women, USA
Action Towards Bridging the Gender Equality Gap in STEM to Transform the Pipeline in Africa Providing Rich, Experiential Learning in Global Health: The African Research Academies for Women

Rina Friedberg, Statistics, Stanford University, USA

Room: Columbia 8/11/12 // Terrace Level
Meet the Editors

Finding the right journal for your work can be confusing and at times frustrating. What are editors of different global health journals looking for in a manuscript? How can you “sell” your paper to an editor or a journalist? And what are the innovations and challenges in the world of publishing today? Join the Editors of both established and new global health journals, plus representatives from the popular media, to hear about these issues and more in a frank and interactive discussion.

Moderator:
Zoe Mullan, Editor, Lancet Global Health, UK

Speakers:
Philip Landrigan, Editor, Annals of Global Health, USA
Juhwan Oh, Editor, Journal of Global Health Science, Korea
Martin LaMonica, Deputy Editor for Health/Science, The Conversation, USA
Audrey Ceschia, Editor-in-Chief, The Lancet Public Health, USA

10:00 am - 10:20 am
Room: Concourse Foyer and Columbia Foyer
Health Break, Exhibits, Network

10:20 am - 10:45 am
Room: International Ballroom Center
Welcome Session

10:45 am - 11:00 am
Room: International Ballroom Center // Concourse Level

11:00 am - 11:30 am
Room: International Ballroom Center // Concourse Level

PL01: PLENARY SESSION

Keynote Address

11:30 am - 1:00 pm
PL02: PLENARY SESSION

Emerging Infectious Diseases and their Impact on Global Health Security
Track: Non-Communicable & Communicable Diseases

This Plenary Panel will highlight the continual threats of emerging and re-emerging infectious diseases, and their impact on global security for surveillance, detection, treatment and prevention of these diseases. Over recent decades, multiple epidemic events have underscored how highly vulnerable we are to viral threats. Our world is globally connected—and an "emerging threat" in one part of the world can pose a threat everywhere and to everyone. About 75 percent of new human diseases are caused by microbes that originate in animals. These include HIV, influenza (including pandemic H1N1, H5N1, and H7N9), Severe Acute Respiratory Syndrome (SARS), Middle East Respiratory Syndrome-Coronavirus (MERS-CoV), Ebola, Marburg, and Nipah. This panel of leading experts will discuss the emergence of these microbial threats, and our ability to detect, respond and prevent future epidemics of these pathogens.

Moderators:
Tom Quinn, Chief, International HIV/STD Research Section, Associate Director of International Research, DIR NIAID, and Director of Global Health, John Hopkins University, USA
Man Charurat, Director, Center for International Health, Education, and Biosecurity (CIHEB) and Director of the Division of Epidemiology and Prevention at the Institute of Human Virology, USA

Speakers:
Anthony Fauci, Director, NIAID, USA
Chikwe Ihekweazu, Director General, Nigeria CDC, Nigeria
Peter Hotez, Dean, National School of Tropical Medicine, Baylor College of Medicine, USA
Jonna Mazet, Executive Director, One Health Institute, and PI, PREDICT project, UC Davis, USA
Jennifer Nuzzo, Senior Scholar, Center for Health Security, Johns Hopkins University, USA

11:30 am - 1:00 pm
Room: International Ballroom East // Concourse Level

PL03: PLENARY SESSION

Future of Health and Health Diplomacy
Track: Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

This plenary will discuss how diplomacy is critical to the programmatic and financial sustainability of health program implementation. Ambassador Mark Dybul, the Co-Director of the Center for Global
Health Practice and Impact at Georgetown University, will provide examples from his own leadership experience and current work in outlining why diplomacy is a critical tool to sustainably improve populations’ health and wellbeing and is necessary for achieving goals of equity and social justice. The plenary will explore the challenges of teaching these diplomatic skills in the classroom and the field, and the role of the academic community in preparing current and future health practitioners.

**Moderator:**  
*Mark Dybul,* Co-Director of the Center for Global Health and Quality, Professor, Medicine Department, Georgetown University Medical Center, USA

**Speakers:**  
*Victor Dzau,* President of the National Academy of Medicine, USA  
*Ambassador-at-Large Deborah L. Birx,* Coordinator of the United States Government Activities to Combat HIV/AIDS, US Special Representative for Global Health Diplomacy, USA  
*Elizabeth Cameron,* Vice President, Global Biological Policy and Programs, Nuclear Threat Initiative, USA  
*Deus Bazira,* Co-Director of the Center for Global Health Practice and Impact at Georgetown University Medical Center, USA

1:00 pm - 2:30 pm  
Room: Concourse Foyer and Columbia Foyer  

Lunch Break, Posters, Exhibits, Network

1:00 pm - 2:30 pm

Poster Abstract Presentations

2:30 pm - 4:00 pm  
Room: International Ballroom Center // Concourse Level

**PL04: PLENARY SESSION**

**Vaccines as a Tool for Global Health Equity**  
Track: Non-Communicable & Communicable Diseases

Vaccines represent one of the greatest public health achievements and are one of the most effective tools of modern preventative medicine. The development of effective vaccines and global immunization programs has led to a significant decline in the incidence of severe and potentially lethal infections and related deaths. It has also led to the eradication / near eradication of once lethal infectious diseases, such as smallpox and polio. Consequently, vaccination – through the control of infectious diseases – has contributed to a striking increase in life expectancy in many countries worldwide and is a tool for global health equity. However, we still face several important challenges towards developing more efficacious
vaccines for many diseases and for different populations. This panel will describe the promise of vaccines as a public health tool and challenges in global vaccinology, including developing vaccines for underserved populations; the effects of migration on vaccine preventable infectious diseases; and vaccine hesitancy.

Moderator:
Kathleen M. Neuzil, Myron M. Levine MD, Professor in Vaccinology and Director, Center for Vaccine Development and Global Health, University of Maryland School of Medicine

Speakers:
Kathleen M. Neuzil, Myron M. Levine, MD, Professor in Vaccinology and Director, Center for Vaccine Development and Global Health, University of Maryland School of Medicine, USA
Samba Sow, former Minister of Health and Public Hygiene, Mali and Director General of CVD-Mali, Mali
Rebecca Martin, Director of the Center for Global Health at the US Centers for Disease Control and Prevention (CDC), USA
Mark Travassos, Co-Director Immunoepidemiology and Pathogenesis Unit, Malaria Research Program, Center for Vaccine Development and Global Health, University of Maryland School of Medicine, USA

2:30 pm - 4:00 pm

PL05: PLENARY SESSION

2020 - The Year of the Nurse and Midwife - Taking Stock and Moving Forward
Track: Strengthening Health Systems, Public Health, Primary and Surgical Care

The World Health Organisation Executive Board has designated 2020 as the Year of the Nurse and Midwife. Dr. Tedros Adhanom Ghebreyesus, Director-General, has emphasized that nurses and midwives are crucial to achieving Universal Health Coverage and the 2030 Sustainable Development Goals. There are 43.5 million health workers globally. It is estimated that 20.7 million of these are nurses and midwives and many of these are in low and middle income countries. There are less than three nursing and midwifery personnel per 1000 population which is of concern in achieving ambitious global targets. The State of the World’s Nursing Report will be launched in Geneva on World Health Day on April 7th and will provide a report on the current state of nursing around the globe and a pathway forward for achieving the 2030 Sustainable Development Goals through advocacy and work force development. This session will discuss the role of nurses and midwives as members of the health care team to advance global health.

Moderator:
Patricia Davidson, Dean, Johns Hopkins School of Nursing, USA

Speakers:
Tedros Adhanom Ghebreyesus, Director-General, World Health Organization, Switzerland (video

War and Global Health: The Urgency of Engagement
Track: Strengthening Health Systems, Public Health, Primary and Surgical Care

War profoundly undermines health in immediate and multi-generational ways. Countries in conflict are least likely to reach the Sustainable Development Goals because of weak health systems, flight of health workers, social conditions that impair health, and lack of resources or spending on health. Urban warfare, attacks on health care, and new weapons exacerbate the harms of war to health. Yet conflict and health remains a footnote in our field. This panel reviews opportunities for academic engagement in research, teaching and policy, introducing a new alliance of academics and practitioners on war, conflict and health.

Moderator:
Leonard Rubenstein, Senior Faculty, Director, Program in Human Rights, Health and Conflict at the Center for Human Rights and Public Health, Johns Hopkins Bloomberg School of Public Health, USA

Speakers:
Alexandra Boivin, Head of Regional Delegation for the United States and Canada, International Committee of the Red Cross, USA

Child Health Equity in the Context of Forced Displacement: Lessons from Lebanon

Track: Addressing Social Determinants of Health

Lebanon has the largest number of refugees per capita in the world and social indicators are often stratified by refugee status. Refugee children face health hazards concurrent with legal and socio-economic hurdles. United Nations agencies, the Government of Lebanon and NGOs have partnered with academia in designing and evaluating refugee child health programs. Researchers will describe intervention studies that address early marriage and child labor, followed by a geospatial analysis of child well-being indices in the context of social determinants and non-medical, health-related social needs. Each panelist will describe how the knowledge gained translates into legislation, policy and program design.

Global One Health: An Integrated Capacity Building Approach to Prevent Pandemics
Track: Planetary Health, One Health, Environmental Health, Climate Change and Pollution

Over two-thirds of emerging and re-emerging infectious diseases are zoonotic in origin, causing an estimated 2.5 billion human illness annually. Capacity to mitigate these threats remains highly insufficient in many African countries. The Ohio State University Global One Health initiative has successfully expanded capacity via a One-Health approach by addressing causes and effects of diseases at the interface of humans, animals, plants and environment. We will discuss methods to successfully integrate solutions expanding on three-prong approach: (1) providing short- and long-term workforce capacity training; (2) strengthening surveillance infrastructure (field-deployable systems and laboratories); and (3) building community awareness through targeted interventions. Additional panel topics include USAID Emerging Pandemic Threats Predict Project and surveillance of viral pathogens and Integrated TB/HIV detection and care in Guatemala.

Moderators:
Wondwossen Gebreyes, Executive Director of The Ohio State University Global One Health initiative (GOHi) and Distinguished Professor of Veterinary Medicine, The Ohio State University, USA
Shu-Hua Wang, Professor of Medicine at The Ohio State University, USA

Speakers:

Public Health Research & Education in LDCs: Learning from North & South
Track: Translation and Implementation Science, High Impact Development Initiatives, Bridging Research to Policy, Reforming Academia

A well-trained global public health workforce is critical for development and health. Most workforce training for the global South occurs in those settings. It is therefore imperative that we share best evidence from these settings, to inform curricular development in the global North, cross-train our global community of academics, and create regional self-sustaining networks of educational collaboration. This panel brings together representative institutions from South Asia, to share their journeys to locally appropriate, globally relevant public health curricula. We also highlight the important role of CUGH in convening collaboratives, and applying core materials such as the Global Health Education Toolkit.

Speakers:
Stephen Morrison, Senior Vice President and Director, Global Health Policy Center, CSIS, USA
Justin Kenny, Owner, Small Footprint Films, USA

Film by Center for Strategic and International Studies (CSIS): Pandemic and Paradox: HIV on the Edge

J. Stephen Morrison (CSIS) and Justin Kenny (Small Footprint Films), with contributions from Sara Allinder (CSIS) and Michael Merson (Duke), are releasing in April the CSIS feature documentary, ‘Pandemic and Paradox: HIV on the Edge.’ In it they examine the long arc of the HIV pandemic -- the early plague years; the subsequent transformations in financing, treatment, and other innovations; and the present era of continued advance technologically and programmatically, against the backdrop of continued high levels of new infections and annual deaths, disquiet and uncertainty over how to sustain the gains achieved, and evident risks of regression. The film draws from on-camera interviews with over three dozen prominent, diverse leaders in the field. The filmmakers visited South Africa, the southern United States, and Ukraine to hear first-hand from those on the front lines. It closes with consideration of future priorities and what lies ahead, as HIV approaches its fifth decade. The film will be screened and followed by a panel discussion, moderated by Sara Allinder, with the filmmakers and experts who contributed to the film.

Rohingya in Bangladesh: The World’s Largest Refugee Settlement
Track: Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

The ongoing genocide and ethnic cleansing of the Rohingya ethnic minority from Myanmar added 731,000 new refugees in 2017 to 300,000 older refugees in the Southeastern Bangladesh region of Cox’s Bazar district at the border with Myanmar. With 33 camps, Cox’s Bazaar has the world’s largest concentration of refugees. MedGlobal, a U.S. based NGO, has been engaged in Cox’s Bazaar, in partnerships with local NGOs, UN agencies, and University of Illinois at Chicago Global Health. This breakout session focuses on several top health priorities which are examined from multi-disciplinary perspectives, including medical, mental health, humanitarian and ethical.

Moderators:
Stevan Weine, Professor and Director of Global Medicine, University of Illinois at Chicago, USA

Speakers:
Henna Quraishi, Assistant Professor of Pediatrics, Virginia Commonwealth University, USA
Maryam Molla, Field Coordinator, MedGlobal, Bangladesh
Diana Rayes, Global Mental Health Consultant, USA

Leveraging Digital Technology to Build Global Mental Health Research Capacity
Track: Addressing the Social Determinants of Health

The rapid growth of digital technology provides new solutions to transforming mental health care and services, and has the potential to address multiple implementation barriers. This symposium highlights four global mental health research projects supported by the National Institute of Mental Health as a
part of the Fogarty International Center’s “Mobile Health: Technology and Outcomes in Low- and Middle-Income Countries.” We will present how digital technology is applied in clinical interventions, health workforce training, and clinical practice guideline implementation. These innovative projects leverage digital technology to support science-based mental health care and research capacity building in low- and middle-income countries.

Moderator:
Makeda J. Williams, Chief, NIMH Global Mental Health Effectiveness Research Program, National Institute of Mental Health, NIH, USA

Speakers:
Sheikh Iqbal Ahamed, Professor and Chair, Department of Computer Science, Marquette University
Keng-Yen Huang, Associate Professor of Population Health and Child and Adolescent Psychiatry, New York University School of Medicine, USA

Lifting All Boats: Moving Towards Equity in Clinical Education

Faculty and resident physicians from high-income countries face few barriers in obtaining clinical education in many low- and middle-income countries (LMIC), while opportunities for short-term clinical education of international physicians in the United States are limited by federal visa laws, state regulations around the practice of medicine, and institutional policies. This panel will discuss the present state of these barriers, review an example of a productive partnership that has overcome several of these, provide perspective from LMIC faculty on what opportunities they think are most urgently needed, and engage in the audience in discussion around the next steps in advocacy for equity.

Moderator:
James Hudspeth, Assistant Professor of Medicine and Director of Global Health for the Internal Medicine Residency, School of Medicine, Boston University, USA

Speakers:
Bradley A. Dreifuss, Assistant Professor of Emergency Medicine and Director of Rural and Global Emergency Medicine Programs, College of Medicine, University of Arizona - Tucson, USA
Chris Longenecker, Associate Professor of Medicine and Director, Harrington Heart & Vascular Institute Research & Innovation Center at University Hospitals, School of Medicine, Case Western Reserve University, USA
Tracy Rabin, Assistant Professor of Medicine and Assistant Director of the Office of Global Health in the Department of Internal Medicine, School of Medicine, Yale University, USA

Harriet Mayanja-Kizza, Professor of Medicine and Director of the Makerere-Yale Global Health Program, College of Health Sciences, Makerere University, Uganda

Room: Jefferson // Concourse Level

CS21: CONCURRENT SESSION

Towards a Political Economy of Health in Conflict: Health Sector Dynamics in Gaza, Lebanon and Turkey
Track: Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

Armed conflict can have transformative effects on processes of prioritization, policy making and implementation in affected health sectors. However, the particular nature of the changes that health stakeholders face, the evolution in power dynamics between actors, incentive structures, and other political and economic determinants of decision-making are poorly understood. Countries affected by conflict in the MENA region present important contexts for empirical investigation of these factors. This session will bring together preliminary findings from a multi-country analysis focusing on Gaza, Lebanon and Turkey to help delineate the contours of a political economy of health in countries affected by conflict.

Moderator:
Richard Sullivan, Professor of Cancer and Global Health; Director, Institute of Cancer Policy and Director, Conflict & Health Research Group, King’s College London, UK

Speakers:
Sheikh Iqbal Ahamed, Professor and Chair, Department of Computer Science, Marquette University
Fouad M. Fouad, Assistant Professor, Co-Director, American University of Beirut, Lebanon
Mona Jebril, Research Fellow, University of Cambridge, UK
Ilhan Can Ozen, Assistant Professor, Middle East Technical University, Turkey
Ferdinand Eibl, Assistant Professor in Political Economy, King’s College London, UK

Room: Lincoln // Concourse Level

CS22: CONCURRENT SESSION

Developing Competencies and Curriculum for Teaching Implementation Science in Global Health
Track: Translation and Implementation Science, High Impact Development Initiatives, Bridging Research to Policy, Reforming Academia
This panel will describe an interdisciplinary approach used to develop core competencies for teaching and training in implementation science with emphasis on low and middle-income countries within a consortium of global academic institutions. The panel will discuss the framework of core competencies that was developed, and its application to graduate public health programs in selected regional academic institutions globally, and its relevance for codifying and disseminating knowledge assets derived from implementation of global health programs using the global polio eradication initiative as an example.

**Strengthening Acute and Emergency Care Systems for Universal Health Care in Africa**  
Track: Strengthening Health Systems, Public Health, Primary and Surgical Care

Health system strengthening is critical to achieving universal health coverage and acute and emergency care are the backbone of a robust healthcare system. This session will examine African acute and emergency care systems through a public health lens and discuss the following themes: 1) global health equity from an African perspective: development of authentic and accountable partnerships, 2) barriers to strengthening acute and emergency care in Africa, 3) the role of the community health worker and community health clinic in acute and emergency health care, and 4) integration of acute and emergency systems strengthening in Africa.

**Moderator:**  
J**immy Volmink**, Dean of the Faculty of Medicine and Health Sciences and Professor of Global Health, Stellenbosch University, South Africa

**Speakers:**  
**Teri Reynolds**, Clinical Services and Systems Lead, World Health Organization, USA  
**Lee Wallis**, Head of Division of Emergency Medicine, University of Cape Town, South Africa  
**Emmanuel Makasa**, Wits Centre of Surgical Care for Primary Health and Sustainable Development, University of Witwatersrand, South Africa

PL06: PLENARY SESSION
The Great Global Health Debate

Two exciting global health leaders will debate the statement:

Be it resolved that official development assistance causes more harm than good.

Moderator:
Tom Quinn, Chief, International HIV/STD Research Section, Associate Director of International Research, DIR NIAID, and Director of Global Health, John Hopkins University, USA

Against:
Stephen Morrison, Senior Vice President and Director, Global Health Policy Center, CSIS, USA

11:30 am - 12:30 pm
Room: International Ballroom Center // Concourse Level

PL07: PLENARY SESSION
Gairdner Global Health Address

Introduction: Sommer Wedlock, Vice President and Director, Communications, Gairdner Global Health, Canada

Dr. Vikram Patel is the 2019 John Dirks Canada Gairdner Global Health laureate. He was awarded “For his world-leading research in global mental health, generating knowledge on the burden and determinants of mental health problems in low- and middle-income countries and pioneering approaches for the prevention and treatment of mental health in low-resource settings.” During this plenary lecture he will talk about his research and the impact of receiving the Gairdner Award. Dr. Patel has dedicated his research career to raising the global profile of mental health problems through: epidemiological research demonstrating the burden of mental disorders in low- and middle-income countries, their strong association with poverty and with other public health priorities, such as HIV and child growth and development; and intervention research in which he has applied a systematic approach to the design, delivery and evaluation of contextually appropriate psychosocial interventions provided by lay and community health providers.

Speaker:
Vikram Patel, FMedSci, The Pershing Square Professor of Global Health and Wellcome Trust Principal
Research Fellow, Department of Global Health and Social Medicine, Harvard Medical School; Professor, Harvard TH Chan School of Public Health; Honorary Professor of Global Mental Health, Centre for Global Mental Health, London School of Hygiene & Tropical Medicine; Adjunct Professor, Centre for Chronic Conditions and Injuries, Public Health Foundation of India, New Delhi; Co-founder, Sangath, India

12:30 pm - 12:45 pm
Room: International Ballroom Center // Concourse Level

Year of the Nurse

The World Health Organisation Executive Board has designated 2020 as the Year of the Nurse and Midwife. Dr. Tedros Adhanom Ghebreyesus, Director-General, has emphasized that nurses and midwives are crucial to achieving Universal Health Coverage and the 2030 Sustainable Development Goals. The world needs 9 million more nurses and midwives if it is to achieve universal health coverage by 2030. As we grapple with health care challenges globally, we need to consider this workforce as being integral to a coordinated human resources for health strategy.

Presenter:
Patricia Davidson, Dean, Johns Hopkins School of Nursing, US, Australia

12:45 pm - 1:00 pm

PL09: PLENARY SESSION

African Perspectives on Health Professions Education, Research, and Service Delivery in a Time of Worldwide Political Change

Health issues on the African continent are as much affected by worldwide political changes as is global health across the world. The African context, however, provides for unique challenges, but at the same time also presents exceptional opportunities to address these tasks. AFREhealth seeks to contribute towards establishing and sustaining a responsive workforce, providing high quality, evidence-based health care in Africa. The organization functions as a network of networks in Africa, working across multiple countries and numerous regional and international partnerships. This discussion session draws together a diverse panel representing various professions and south-north partnerships, sharing their
experiences in these various domains.

**Moderator:**
*Abigail Kazembe*, Lecturer, Kamuzu College of Nursing, University of Malawi, Malawi

*Joseph Kolars*, Senior Associate Dean for Education and Global Initiatives Josiah Macy, Jr., Professor of Health Professions Education, Professor of Internal Medicine, The University of Michigan, Ann Arbor, USA

**Speakers:**

*Address Malata*, Vice Chancellor of the Malawi University of Science and Technology (MUST), Acting Director for the International Centre for Quality Management and Research (ICQMR) at MUST, Malawi  
*Strengthening African public institutional capacity: Experience from Malawi University of Science and Technology*

*Nadia Adjoa Sam-Agudu*, Pediatric Infectious Disease Specialist, University of Maryland Medical Center, USA  
*Capacity building for implementation science through regional approaches*

*Elsie Kiguli-Malwadde*, Director, Health Workforce Education & Development at African Centre for Global Health and Social Transformation (ACHEST), Uganda  
*Addressing the HIV epidemic through an unique interprofessional approach: STRIPE HIV*

*Marietjie de Villiers*, Professor in Family Medicine and Principal Investigator Stellenbosch University Collaborative Capacity Enhancement in Districts (SUCCEED), Faculty of Medicine and Health Sciences, Stellenbosch University, South Africa  
*Creating equitable and impactful partnerships - The AFREhealth experience*

**4:00 pm - 4:30 pm**
*Room: Concourse Foyer and Columbia Foyer*

**Academic Leadership in an Era of Changing Gender Dynamics**
**Track:** Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

Inclusive Global Health leadership in the 21st century is imperative. In today's changing gender dynamics, academic institutions should exemplify such leadership by creating an equitable environment for accomplished, diverse women and men to excel in health education, research and innovation. Unfortunately, talented women and LGBTQ individuals experience a significant gap between the stated mission and reality of academia's power structure. This panel of GH leaders will address this gap and how universities and research institutions can promote gender equality. Ultimately, this panel could be a call to action to CUGH university leaders to recognize and invest in change.

**Moderator:**  
**Michele Barry,** Senior Associate Dean for Global Health, Stanford University, USA

**Speakers:**
**Abebe Bekele,** Dean of Health Sciences, University of Global Health Equity, Rwanda  
**Ann Kurth,** Dean and Lorimer Professor, Yale University School of Nursing, USA; Fellow, National Academy of Medicine, USA; Fellow, American Academy of Nursing, USA; Chair, Consortium of Universities for Global Health, USA
Patty Garcia, Professor, School of Public Health, Cayetano Heredia University, Peru; Former Minister of Health, Peru; Former Dean, School of Public Health, Universidad Peruana Cayetano Heredia, Peru; Former Chief of National Institute of Health, Peru

Barbara Stoll, Dean, McGovern Medical School, University of Texas Health, USA

4:30 pm - 6:00 pm
Room: Georgetown // Concourse Level

CS29: CONCURRENT SESSION

Mental Health of Trainees and Students

As burnout and physician mental health become increasingly common among healthcare professionals it is essential to address the mental health of students and trainees entering the field of global health. Students who work with those who have experienced trauma, and then return to the demands of an education in healthcare often have extremely limited resources with which to take care of themselves. It is important to know where to find support and resources as well as understand from a fundamental perspective the root cause of mental health challenges starting at the child and adolescent level. For these reasons this panel will provide a discussion of reentry after work abroad, a discussion of the mental health of trainees, and child and adolescent mental health in low and middle income countries.

Moderator:
Priscilla Auguste, Candidate for Doctor of Medicine, Ross University School of Medicine, Barbados

Speakers:
Enryka Christopher, Researcher, Center for Population and Development Studies, Harvard T.H. Chan School of Public Health, USA
Brandon Kohrt, Charles and Sonia Akman Professor of Global Psychiatry, Director, Division of Global Mental Health, George Washington University, USA
Mellissa Withers, Associate Professor, Department of Preventative Medicine, Keck School of Medicine, USC, USA
Pamela Collins, Professor of Psychiatry and Behavioral Sciences, Professor of Global Health, University of Washington, USA

4:30 pm - 6:00 pm
Room: Jefferson // Concourse Level

Role of Zoonotic Disease in Global Instability
Track: Planetary Health, One Health, Environmental Health, Climate Change and Pollution
Zoonotic diseases represent a large percentage of all newly identified infectious diseases as well as existing infectious diseases. Cross-sectoral collaboration is key to understanding and managing public health risks at the human-animal-environment interface and improving global health security. Perspectives from experts across three continents will illustrate lessons learned from emerging and known zoonotic diseases from detection, prevention, and governance structures needed to mitigate global instability. Recommendations will detail capacity building examples and practical, evidence-based, and cost-effective tools and mechanisms for zoonoses prevention, surveillance and detection, epidemiological and laboratory investigation, risk assessment, and control measures.

**Moderator:**
Michael Lairmore, Dean and Distinguished Professor, School of Veterinary Medicine, University of California, Davis; Member, National Academy of Medicine; President, Association of American Veterinary Medical Colleges, USA

**Speakers:**
Janetrix Amungi, Associate Professor, Department of Infectious Disease and Global Health, USAID/One Health Workforce Senior Technical Lead-Africa Senior Faculty Advisor Tufts-UGHE-UR One Health Collaborative, Tufts Cummings School of Veterinary Medicine, USA

**Addressing NCDs in LMICs Using Community Health and Other Frontline Workers: Constraints and Innovative Approaches**
Track: Non-Communicable & Communicable Diseases

Primary health systems in LMICs are struggling to implement effective strategies to address the rising NCD epidemic. Front-line workers, including community health workers, have an important role to play in health care delivery and prevention, but there are many challenges. This session will discuss findings from case studies in Asia and Africa regarding task sharing, workforce preparedness, effectiveness, and the sustainability of such a workforce in the context of weak health care systems and resource constraints. This session draws together research and expertise by leading and emerging researchers from the Nossal Institute for Global Health at the University of Melbourne and the George Institute at the University of New South Wales together with their collaborating partners in Asia and Africa.
Moderators:
Barbara McPake, Director and Professor, Nossal Institute for Global Health, University of Melbourne, Australia

Speakers:
Teralynn Ludwick, Research And Teaching Assistant at Nossal Institute of Global Health, University of Melbourne, Australia
Rohina Joshi, Associate Professor, The George Institute, UNSW, Australia; The George Institute, India
Brian Oldenburg, Professor, Non-Communicable Disease Control, Director, WHO Collaborating Centre of Implementation Research for Prevention & Control of NCDs, Nossal Institute for Global Health, University of Melbourne, Australia

4:30 pm - 6:00 pm

Global Health Humanities: A Critical Examination of Empathy in Intercultural Global Health Contexts

Global Health Humanities (GHH) is an emerging field in global health that looks at the global problems through the variegated lenses of the humanities. This panel discussion will define and describe the field of GHH through a series of talks on empathy as a fundamental, but largely unexamined concept in global health. Highlighting the opportunities, limitations and pitfalls of empathy, this panel aims to provide fresh perspectives and solutions to a range of issues regarding global health settings, by sharing four critical perspectives: (1) the cultural expressions and portrayals of empathy often ignored by Western traditions; (2) the concept of social empathy and the role of contextual and self-aware engagement towards social justice; (3) the legitimacy of empathy and compassion as effective other-oriented practices; (4) a discussion around privilege, power and Othering in the context of short-term experiences in global health (STEGHs).

Moderator:
Quentin Eichbaum, Professor of Pathology, Microbiology and Immunology and Professor of Medical Education and Administration at Vanderbilt University, USA

Speakers:
Charles-Antoine Barbeau-Meunier, MD/PhD Candidate, Université de Sherbrooke, Quebec, Canada
Mary White, Professor, Department of Population and Public Health Sciences, Boonshoft School of Medicine, Wright State University, USA

**Building Diagnostic Pathology Capacity in Africa - Viability of the “Tiered” Approach to Laboratory Testing**

Pathology is severely under-capacitated on the African continent with an estimated shortfall of 27,000 pathologists (Nelson et al, 2011). The pivotal role of pathology and quality assured laboratory testing in health care delivery has likewise been under-appreciated. Coupled with under-resourced and poorly standardized laboratory testing, effective diagnosis becomes challenging leading to presumptive and often incorrect diagnoses and treatment plans that are ineffective and even harmful. Several solutions to this problem have been suggested. Key among these suggested approaches is the “tiered” approach to diagnostic testing that lists specific tests, equipment and quality assurance processes appropriate for each of the four tiers of clinics/hospitals: rural clinics; district hospitals, provincial hospitals, and national teaching hospitals (The Lancet, 2018). However, whether (or to what extent) the “tiered” approach has to date been successfully implemented in African countries remains unclear. This panel will explore the constraints and challenges to implementing the tiered, or similar, approaches to diagnostic testing in Africa.

**Moderator:**
**Quentin Eichbaum,** Professor of Pathology, Microbiology and Immunology and Professor of Medical Education and Administration at Vanderbilt University, USA
Speakers:

Challenges to Health Improvement in Middle-Income Countries: Loss of Foreign Aid, Demographic Shifts, and the Epidemiological Transition
Track: Politics, Law, Corruption, Human Rights, Governance, Diplomacy, Strengthening Public Institutions

Middle-income countries (MICs) are facing several critical transitions including a shift from infections to non-communicable diseases (NCDs), aging populations, a bulge in the adolescent band of the population pyramid, and the loss of foreign aid for health programs. If these transitions are not well managed, countries could experience backsliding, such as disease resurgence, worsening medical impoverishment, and widening health inequities. This session will provide practical, actionable guidance on the steps that MIC governments, donors, and other key stakeholders can take to mitigate these risks and continue to make progress in achieving universal health coverage and the health-related Sustainable Development Goals.

Moderator:
Gavin Yamey, Professor of Global Health and Public Policy, Director of the Center for Policy Impact in Global Health, Duke Global Health Institute, USA

Advancing Quality in Global Health Systems: Quality Management is Critical in the Pathway to Sustainable Change
Track: Strengthening Health Systems, Public Health, Primary and Surgical Care

Based on experiences in Africa, Latin America, and Asia, this session will address the relevance of quality management and its application in low and middle-income countries which often face critical health system challenges. We will examine this in a diverse set of applications of quality management including quality planning and governance, improvement at scale, and improvement in the context of health emergencies. Presenters will discuss challenges, adaptations, and opportunities to harness the strength of quality management methods to sustainably strengthen equitable, high-performing health systems. Participants will share their experiences and apply these methods to their own quality work.

Moderator:

DoD’s Role and Collaboration with Partners in the Global Health Space

The U.S. Department of Defense (DoD) plays a unique role in contributing to ongoing global health efforts through its dedication to achieving U.S. national security objectives. DoD plays to its strengths by focusing on building military and civilian partner nation capacity, and maintaining partner nation interoperability and influence in potential conflict regions. In doing so, collaborating and coordinating with other U.S. government departments and agencies, national governments and international and non-governmental organizations are essential to obtaining the best possible health and security outcomes and avoiding duplication of effort.

*Global Health Perspectives on Academia’s Response to Unrest or Conflict*

Political and social unrest around the world increasingly affect not only our countries and communities but our academic institutions as well. Universities face the challenges of keeping their students, faculty, and staff safe; trying to maintain an academic schedule; and potentially becoming embroiled within the conflicts themselves. This session will explore several perspectives on how academia can respond to these situations, taking guidance from current areas in conflict or unrest.

**Moderator:**
**Ayman El-Mohandes**, Dean, CUNY Graduate School of Public Health and Health Policy, USA

**Speakers:**
**Hala Ghattas**, Director of our Center for Research on Population and Health, American University of Beirut, Lebanon

**Núria Casamitjana**, Director of Training and Education, ISGlobal, Barcelona Institute for Global Health, Spain

**Chang-Chuan Chan**, Dean, National Taiwan University College of Public Health, Taiwan

9:00 am - 10:30 am
Room: Lincoln // Concourse Level

**CS40: CONCURRENT SESSION**

*Driving Action for Training the Health Equity Workforce of Today and Tomorrow*

Track: Addressing the Social Determinants of Health

In this panel, presenters will define pathways for strengthening the health workforce through training at the academic, professional, community, and governmental levels. Presentations will explore research needed to achieve global recommendations to advance health equity. Strategies for training and research will include: competencies for trainees at schools and programs of public health completing
health equity training; community-engaged and participatory practices for research collaboration; institutional capacity for coproduction of knowledge across different stakeholders; participatory leadership among researchers, civil society members, and policymakers to optimize their collective ability to implement action that uses a health equity lens in day-to-day practices.

Moderator:
Michael Rodriguez, Professor and Vice Chair of the UCLA Departments of Family Medicine and Community Health Sciences, Founding Director of the Health Equity Network of the Americas, and Founding Chair of the UCLA Minor in Global Health, USA

Speakers:
Ana V. Diez Roux, Dean and Distinguished Professor of Epidemiology, Dornsife School of Public Health, Drexel University, USA
Patty Garcia, Professor, School of Public Health, Cayetano Heredia University, Peru; Former Minister of Health, Peru; Former Dean, School of Public Health, Universidad Peruana Cayetano Heredia, Peru; Former Chief of National Institute of Health, Peru
Laura Magaña, President and CEO, Association of Schools and Programs of Public Health, USA

9:00 am - 10:00 am
Room: Columbia 3,4 // Terrace Level

CS41: CONCURRENT SESSION

ORAL ABSTRACT PRESENTATIONS: Strengthening Health Systems, Public Health, Primary and Surgical Care

Speakers:
Anne Hansen, Division of Newborn Medicine, Children’s Hospital Boston, USA
Non-electric Infant Warmer to Complement Skin to Skin Care

Nisha Nadesan-Reddy, Center for Rural Health, University of KwaZulu-Natal, South Africa
A Multidimensional Model of Mentorship for Emerging Health Research Leaders

Nandini D P Sarkar, Department of Public Health, Institute of Tropical Medicine, Belgium
Afya-Tek: Formative Research Towards a Digitally-enabled, Community-Based Responsive Health System Initiative in Tanzania

Elizabeth Jackson, Mailman School of Public Health, Columbia University, USA

Davika Reid, School of Nursing, The University of Texas at Austin, USA
Assessment of Term-Newborn Care Recommendations in the Curricula at a Baccalaureate-Level
Nursing School and Tertiary Public Maternity Hospital in Western Kenya

Juliet Iwelunmor, College for Public Health and Social Justice, Saint Louis University, USA
An Innovation Bootcamp Model for Developing HIV Self-Testing Social Enterprise Among Young People in Nigeria

Chisom Obiezu-Umeh, College for Public Health and Social Justice, Saint Louis University, USA
Developing HIV Self-Testing Services Through Youth Engagement: A Qualitative Evaluation of a Health Designathon in Nigeria

9:00 am - 10:00 am
Room: Columbia 6 // Terrace Level

CS42: CONCURRENT SESSION

ORAL ABSTRACT PRESENTATIONS: Non-Communicable & Communicable Diseases (NCDs)

Speakers:
Karla Unger-Saldaña, Epidemiology Research Unit, Mexican National Cancer Institute, Mexico
Breast Cancer Diagnostic Delays in Mexico and Peru

Wafa Alam, BRAC James P Grant School of Public Health, BRAC University, Bangladesh
Readiness of Primary Health Care Facilities for the Management of Non-communicable Diseases in Rural Bangladesh

Kaitlyn Friedman, Duke Global Health Institute, USA
Association of Alcohol Use and Violence-Related Injury in Emergency Department Patients in Moshi, Tanzania

Andrew K Tusubira, Uganda Research, Uganda Initiative for Integrated Management of Non-Communicable Diseases (UINCD), Uganda
Self-Care Practices and Needs Among Patients with Hypertension and/or Diabetes in Rural Uganda: A Mixed-Methods Study

Gillian Ice, Social Medicine, Ohio University, USA
Prevalence and Determinants of Hypertension Unawareness among Egyptian Adults: The 2015 EHIS

Sanjana Nujhat, BRAC James P Grant School of Public Health, BRAC University, Bangladesh
Prevalence of Risk Factors of Non-Communicable Diseases (NCDs) in Rural Population of Bangladesh: A Cross-Sectional Study

Sarah Moor, School of Medicine, Yale University, USA
Development of a Discrete Choice Experiment to Understand Patient Preferences for Diabetes and
Hypertension Management in Rural Uganda

9:00 am - 10:30 am
Room: Columbia 8/11/12 // Terrace Level

CS43: CONCURRENT SESSION

A Future Beyond Imagining: How Humanities May Contribute to Responses to Climate Change
Track: Planetary Health, One Health, Environmental Health, Climate Change and Pollution

Climate change represents an existential threat to global health. This panel will explore the role that health humanities can play in motivating personal and political activism, and in identifying the moral grounds, interdisciplinary expertise, and political considerations necessary to revise current social norms. It includes the role of narrative and art in countering denial, how concerns of politics and power have constrained responses to the crisis, and limitations of Western ethical canons in addressing this challenge. It will conclude by pointing towards a bioethics that focuses beyond immediate human concerns to encompass a sustainable future for life on earth.

Moderator:
Quentin Eichbaum, Professor of Pathology, Microbiology and Immunology and Professor of Medical Education and Administration at Vanderbilt University, USA

Speakers:
Liz Grant, Assistant Principal (President) at the University of Edinburgh, Professor of Global Health and Development and Director of the University's Global Health Academy, UK
Revathi Ravi, Instructor in Medicine and Pediatrics at Harvard Medical School and Assistant in Medicine at Massachusetts General Hospital, USA
Lise Saffran, Director of the Master of Public Health Program at the University of Missouri and Co-Chair of the Health Humanities Consortium, USA
Mary White, Professor of Medical Ethics and Humanities at the Boonshoft School of Medicine, Wright State University, USA

10:30 am - 10:45 am
Room: Concourse Foyer and Columbia Foyer

Health Break

10:45 am - 12:15 pm
Room: International Ballroom East // Concourse Level

PL10: PLENARY SESSION
**NIH leaders describe their vision for global health**

What are the global health interests and funding priorities of the U.S. National Institutes of Health leadership team? Find out by joining this session, where you’ll meet NIH Director Dr. Francis Collins and some new and continuing NIH leaders. They’ll describe a major upcoming initiative to strengthen data science in Africa, genomics breakthroughs that are rapidly improving diagnoses and treatment, the research agenda in global cancer research, and a new strategic plan for maternal and child health, among other timely issues. You’ll also have a chance to ask them about your own areas of interest.

**Moderator:**
Roger I. Glass, Associate Director for Global Health Research, NIH and Director, Fogarty International Center, NIH

**Speakers:**
- Francis S. Collins, Director, NIH
- Diana Bianchi, Director, Eunice Kennedy Shriver National Institute of Child Health and Human Development, NIH
- Patti Brennan, Director, National Library of Medicine, NIH
- Satish Gopal, new Director, Center for Global Health, National Cancer Institute, NIH
- Jill Heemskerk, Deputy Director, National Institute of Biomedical Imaging and Bioengineering, NIH

**10:45 am - 12:15 pm**  
Room: Jefferson / Concourse Level

**PL11: PLENARY SESSION**

**The Planetary Health-One Health-Environmental Health Opportunity: How We Can Save the Planet and Ourselves**

This plenary session will address leading planetary health threats. Speakers will share practical, high impact solutions and the co-benefits they provide for health and environmental outcomes. The benefits will be framed against the backdrop of their impact on the Sustainable Development Goals including: noncommunicable diseases, infectious diseases, security and poverty reduction. Attendees will learn how to bridge the science-political divide to gain support for evidence based solutions that can address urgent environmental threats in these challenging political times.

**Moderator:**
Keith Martin, Executive Director of Universities for Global Health, USA

**Biodiversity Losses - the 6th Extinction**

**Speakers:**
- Jon Patz, Professor and John P. Holton Chair of Health and the Environment, Director, The Global Health Institute, University of Wisconsin-Madison, USA
**Climate Change**

**Sandra Postel**, Director and Founder, Global Water Policy Project, National Geographic, USA

**Freshwater Security**

**Andrew MacCabe**, President, AAVMC, USA

**Animal Health and Human Health**

12:15 pm - 1:30 pm  
Room: Concourse Foyer and Columbia Foyer

Lunch Break

1:30 pm - 3:00 pm  
Room: International Ballroom East // Concourse Level

**PL12: PLENARY SESSION**

**What Will it Take to Build Capacity to Control Cervical Cancer Globally?**

This session will highlight the need for a whole of society approach to the control of cervical cancer, a preventable and treatable cancer that affects over half a million women each year with more than 80% of those being from low- and middle-income countries. The interactive session will explore the importance of research, policy, partnership-building and strategic coordination to ensure impact at the local and global level. Panelists will consider efforts and lessons learned in various settings globally to address cervical cancer, assessing how health disparities result in no access to care in underserved populations. After laying the groundwork for discussion, the panelists will field suggestions from participants about the gaps that have not been presented, additional questions that need to be asked, and best practices that are working right now in particular settings or in particular disease areas from which lessons can be learned.

**Moderator:**
**Edward L. Trimble**, Senior Advisor for Global HPV and Cervical Cancer Research and Control, Office of the Director, National Cancer Institute, National Institutes of Health, USA

**Speakers:**
**Isaac F. Adewole**, Professor, Obstetrics and Gynaecology, University of Ibadan, Nigeria  
**Karla Alfaro**, Medical Director, Basic Health International, El Salvador  
**Ophira M. Ginsburg**, Associate Professor, Department of Population Health; Associate Professor, Department of Medicine; Director Perlmutter Cancer Center High Risk Program, USA  
**Julie S. Torode**, Director of Special Projects, Union for International Cancer Control, Switzerland

1:30 pm - 3:00 pm
Gun violence is a major global public health issue and the Americas are in the midst of an unmitigated public health crisis. For over a decade now, the Americas have had the highest rates of lethal violence in the world. Guns are the vector of this disease epidemic. According to a recent JAMA study, of the over 250,000 global gun deaths each year, six countries account for more than half—the U.S., Mexico, Brazil, Colombia, Venezuela and Guatemala. And just as it does in the region’s countries, the epidemic also concentrates within the region’s cities and affects mostly younger populations. In 2018, 47 of the 50 most violent cities in the world were in the Americas, with gun violence regularly constituting upwards of 80% of fatalities. Reducing gun violence has become a top priority for citizens and governments throughout the hemisphere, with cities, at the epicentre of the crisis, showing remarkable leadership.

**Moderator:**
Jeremy Biddle, Founder and Executive Director of the Metropolitan Peace Institute (MetroPEACE), USA

**Speakers:**
Jessica Molina, whose husband was forcibly disappeared in Nuevo Laredo by Mexican Navy troops last year, and who has testified before the Inter-American Human Rights Commission, Mexico
Arturo Cervantes Trejo, Chair of Health Sciences, Anahuac University, Mexico
Philip Alpers, Founder of GunPolicy.org, Adjunct Associate Professor, Sydney School of Public Health, The University of Sydney, Australia
John Lindsay-Poland, Stop US Arms to Mexico, A Project of Global Exchange, USA
Leila N. Sadat, Special Advisor on Crimes Against Humanity, International Criminal Court Prosecutor, James Carr Professor of International Criminal Law; Director, Whitney R. Harris World Law Institute, Washington University School of Law, USA

3:00 pm - 3:15 pm
Room: International Ballroom East // Concourse Level

**Summary and Closing**

3:30 pm - 5:00 pm
Room: Georgetown // Concourse Level

**Pulitzer Center for Crisis Reporting Communications Workshop**

This special session of the 11th Annual CUGH Conference brings together communication specialists, researchers and Pulitzer Center-supported global health journalists. The goal: to educate workshop participants about the skills needed to pitch a story, translate complex issues to a lay audience, and
make both traditional and nontraditional media work for them. Participants will get a chance to try out their story ideas too during pitch sessions!

**Moderator:**
Amesh Adalja, Senior Scholar, Center for Health Security, Johns Hopkins University, USA

**Speakers:**
Jon Cohen, Senior Correspondent, *Science* Magazine, USA
Isabella Gomes, 2019 Johns Hopkins Bloomberg-Pulitzer Center Reporting Fellow, USA
Ann Peters, University and Community Outreach Director, Pulitzer Center, USA
Brian W. Simpson, Editor-in-Chief, *Global Health NOW* and Hopkins Bloomberg Public Health Magazine, USA
